

## **To make a real impact**

At Hissmekano we work with continuous improvements. We help our customers to succeed by saving their time and with our competitive pricing. We support our suppliers through price control, quality assurance and by helping them to reach a larger market through our network. We develop our organization through education, challenges and empowerment. We work this way because we want to make an impact in our industry. We are celebrating 80 years this year, and we have a successful year behind us, proving that our concept works. Our success is based on the support of our customers, suppliers and co-workers.

We are proud of what we have achieved, and we will continue to improve ourselves as we have still a lot to do. The owners\_together with the Hissmekano team are now increasing our ambitions. We have decided to finance a project driven by the organization Hand-in-Hand to help a whole village in Kenya. Through education in entrepreneurship, vocational training and savings for micro loans; the project helps women to start companies that can take them and their families out of poverty. In this way a village of between 1,000 and 2,000 people reach a new standard of living! Hand-in-Hand supports 13 of UN's 17 global goals for sustainable development, known as Agenda 2030. The investment per village is 350,000 SEK over two years.

The reason you receive this letter is that you are one of the persons that work with Hissmekano, as a customer, supplier, employee or owner. We are grateful for our cooperation and that you have helped making this project possible. We wish you a prosperous 2019 and many years to come.

**Together we can make a real impact in the world we live in!**
